Bus

96 lines

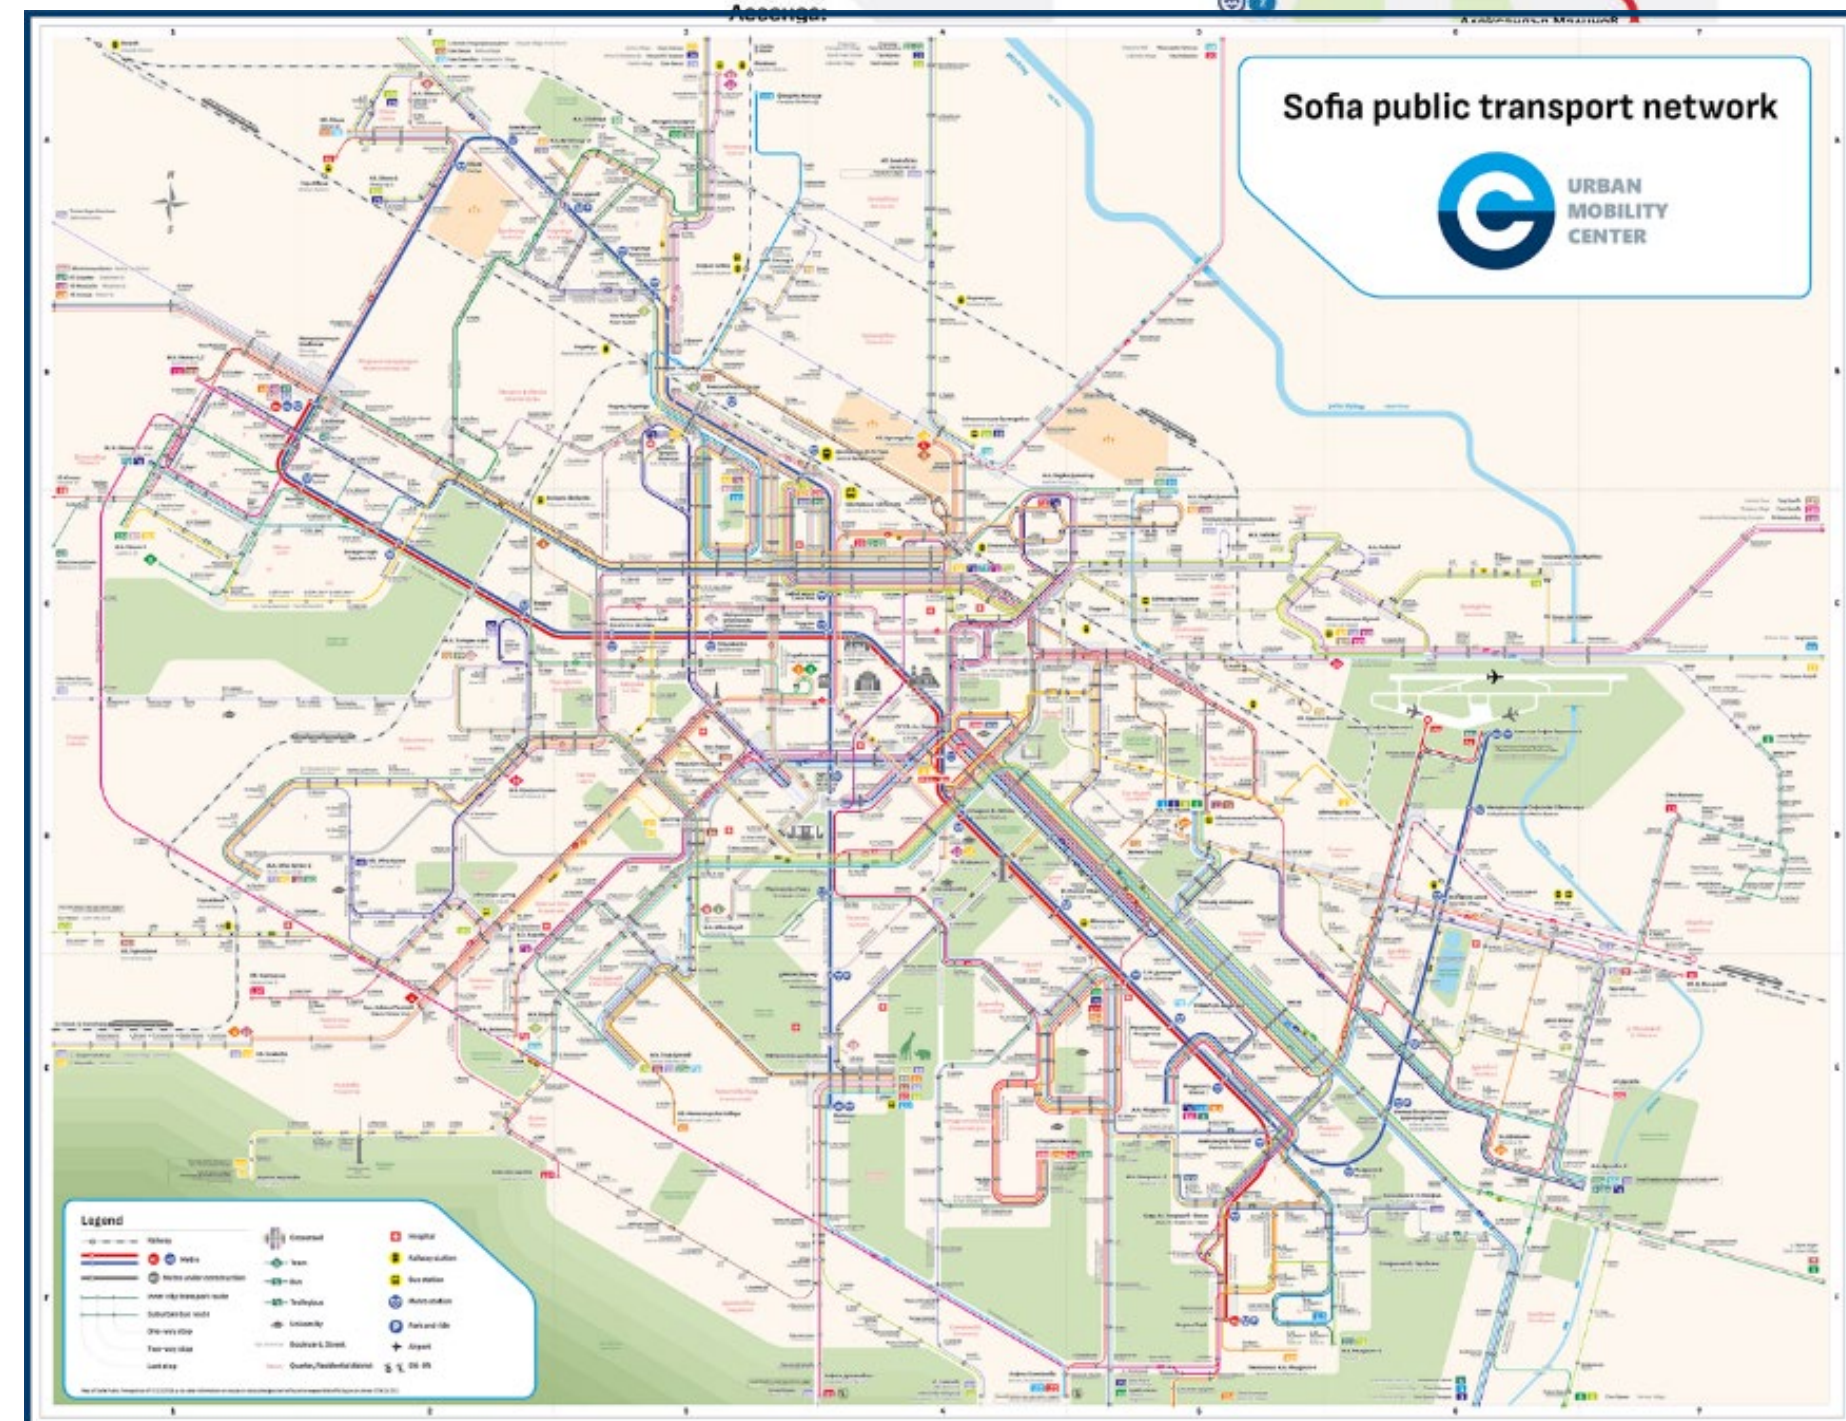

796 buses (334 CNG, 126 e-buses)

Trolleybus

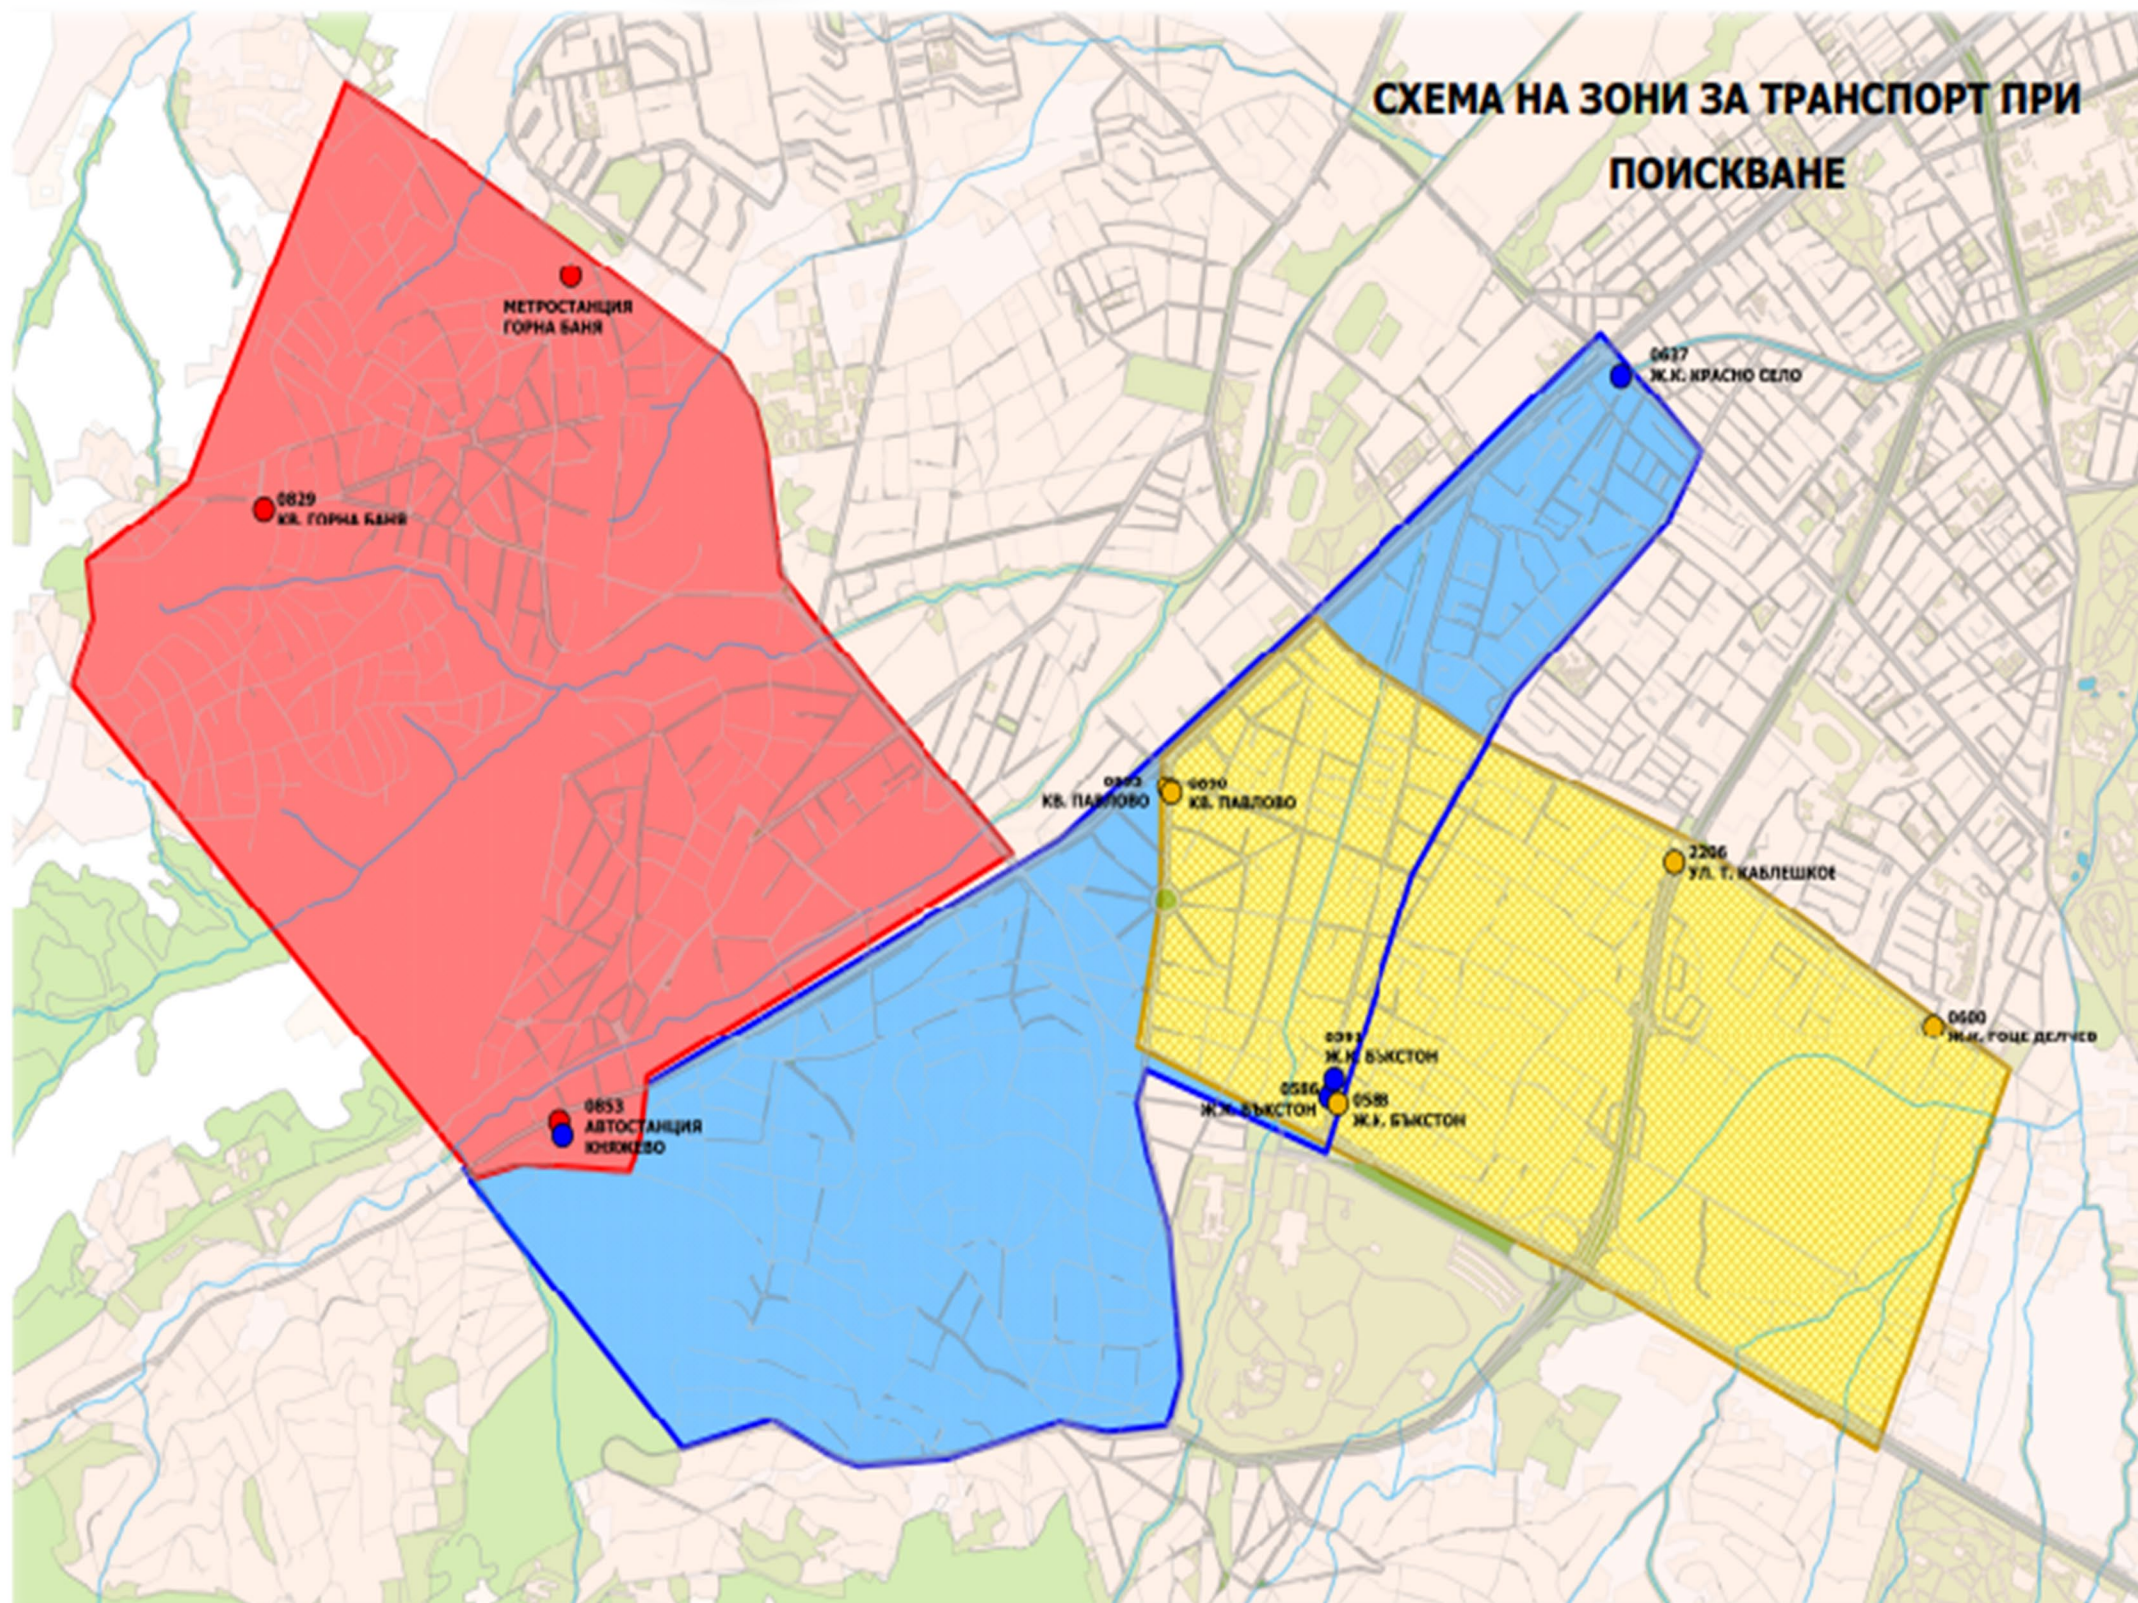

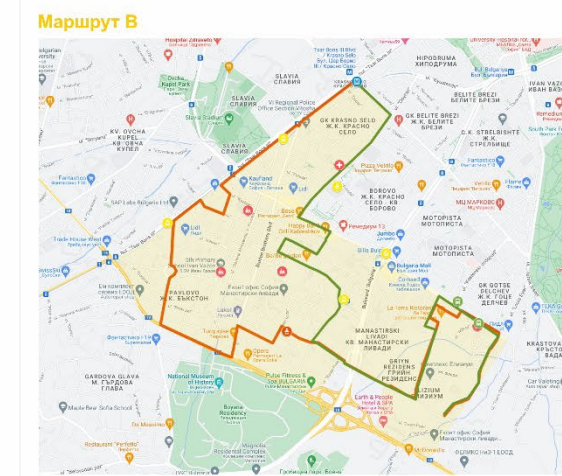

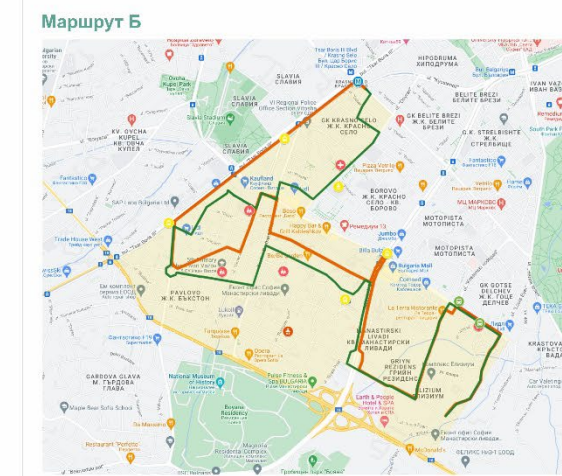

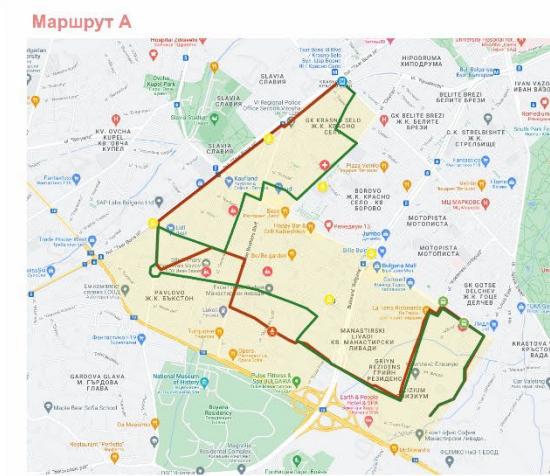

10 lines

125 trolleybus

Green public on-demand transport

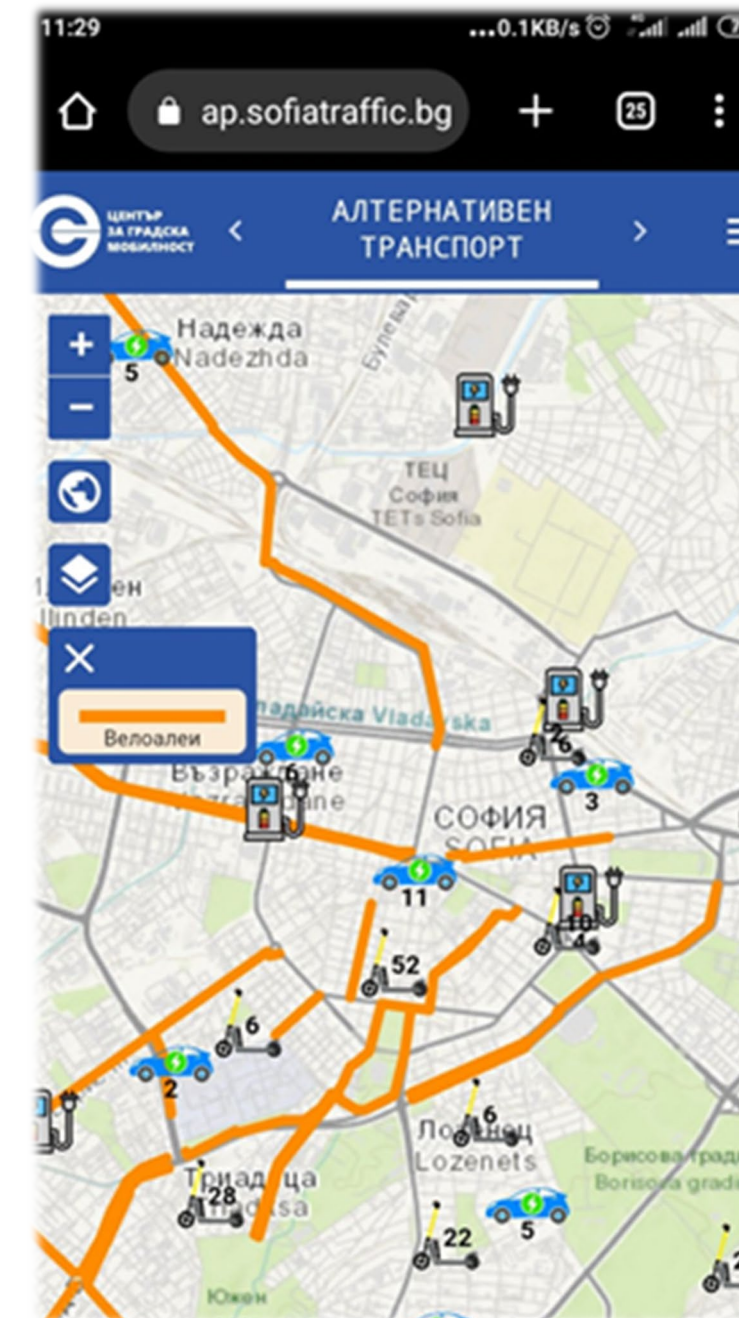

Green corridors:

- Sections of the city's transport network that provide zero-emission transport
- A natural continuation of the new on-demand transport service
- A component of the project preceding the introduction of the low-emission zones and the congestion charge, which provides an alternative to the private car for urban mobility and promotes a change in mobility choices.

Digital map – real time information

- Public transport
- Alternative transport
- Green corridors
- **Charging stations for e-cars**
- **Renovation**
- **Repair activities in the city**

Measures to change the choice of movement in the city

- New vehicle documents for public transport with the possibility to transfer within 30 minutes and 60 minutes. Possibility to buy an annual card in installments. Card for youth up to 26 years old.
- Increasing electric vehicles in the bus fleet
- "Park and Ride". Charging stations for electric cars. Free parking for electric cars for up to 4 hours in the buffer car parks when charging. Free parking for electric cars in the paid hourly parking zone
- Information about current repairs in the city and facilitating citizens in their choice of movement
- Survey studies on passenger behavior on the territory of the Metropolitan Municipality and satisfaction with public transport
